

# MASTER OF SCIENCE IN DATA INTELLIGENCE

OFFERED JOINTLY BY THE DEPARTMENTS OF  
**INDUSTRIAL AND MANAGEMENT SYSTEMS ENGINEERING  
& COMPUTER SCIENCE AND ENGINEERING**

In this modern era, we recognize the growing demand for data-savvy professionals with knowledge of data science, systems optimization, and machine learning. The faculty of Industrial Engineering and Computer Science have jointly developed this program to help you gain the skills and credentials you need to advance your career by leveling up your knowledge for data driven decision making in industry and business.

## About USF's MS in Data Intelligence

USF's Master's in Data Intelligence will prepare you to extract intelligence and knowledge from data to answer questions and make critical decisions for complex systems. Ready to take the next step toward advancing your career? **Here's how our program can help:**

### FULL-TIME AND PART-TIME OPTIONS

Complete this 30-credit program in as little as 3 semesters full-time or 6 semesters part-time.

### STUDY IN-PERSON OR ONLINE

There are unique benefits to both studying primarily online and studying on campus. Choose the right option that aligns with your busy lifestyle.

### FLEXIBLE PROGRAM CONCENTRATIONS

The MS in Data Intelligence offers two areas of specialization — Decision Intelligence and Computational Intelligence. You'll also have the option to select electives from both tracks.

### AFFORDABLE COSTS

Our low cost of tuition means less debt after graduation and a greater return on investment when it comes to advancing your career.

### INTERNATIONAL STUDENTS

The program is designed to facilitate participation of international students.
