

Call for Authors *(2nd Round)*

Sustainable Industry Focused Supply Chain Management

A New Book Series from CRC Press, Taylor & Francis Group

Series Editors: Prof. Dr. Md. Mamun Habib, Prof. Dr. Erick Jones, Sr & Dr. Ferdoush Saleheen

AIM & SCOPE

This new book series is dedicated to providing a thorough analysis of the latest trends and practices in supply chain management (SCM) across various industries. Topics covered include sustainable procurement and its operations, green logistics management, best practices in green manufacturing, reverse logistics, supply chain integration, industry-specific regulatory compliance and standards, collaborative partnerships, risk management, circular economy principles, low carbon logistics, transportation, performance metrics for sustainable reporting, sustainability standards and governance, and forecasting demand and supply fluctuations in this rapidly changing industry landscape.

The series will explore the contemporary challenges in supply chain management such as global disruptions, sustainability issues, changes in international leadership and geopolitics, and their impacts on trade, business, and regulatory compliance. Readers will also gain insights into adopting best industry practices across various industrial sectors, including manufacturing and the service industry. The series will cover the challenges faced during recent disruptions such as the COVID-19 pandemic, post-pandemic recovery, and global unrest resulting from conflicts and discuss how organizations have maintained uninterrupted supply chain operations through their best-in-class strategies.

Additionally, the series will analyze end-to-end risk management in supply chain operations, focusing on strategies to mitigate disruptions, maintain supplier relationships, and ensure smooth connectivity and operations. Included books in this series will explore the importance of synchronizing, adapting, and balancing global and local aspects of supply chain management to enhance efficiency and responsiveness.

This book series is designed for readers who are navigating the complex landscape of supply chain management. Consideration will be given to a broad range of textbooks, reference works, and handbooks that appeal to academics, practitioners, and students. We encourage the submission of all relevant topics.

Prof. Dr. Md. Mamun Habib

Prof. Dr. Erick Jones, Sr

Dr. Ferdoush Saleheen

Proposals may be submitted to:

Prof. Dr. Md. Mamun Habib
